

NEA Facilities and Air Quality Update

January 8, 2019

The Connecticut Department of Labor, Division of Occupational Safety and Health, recently made the report of their inspection of Northeast Academy on October 16, 2018 available. The report concludes "...there were no apparent violations of CONN-OSHA standards".

Copies of the full report are available at Northeast Academy in the main office.

In addition, mandated radon testing is now underway in classrooms and throughout the school.

If you have any questions, please contact NEA school administration.
