

## Summer Math Fun G4

Pick a square, do the activity, and record it in your passport!

You only need to record 5 activities but try to do them all!

Catching up on your summer reading? How many pages more or less than 100 does your book have?	Pick a board game and play. What math do you do while playing the game?	Plan on seeing a movie? How many people will you invite? Tickets cost \$8; calculate the total cost for you and your friends!
Taking a ride in a car, bus, or train? Keep track of the number of minutes you travel! Calculate what time you will get back home when you leave.	Measuring liquid is fun! Gather measuring cups and some containers. How many 1 cup full fits in a container; how many $\frac{1}{2}$ cups? How many $\frac{1}{4}$ cups? Experiment with different containers and see if you can find a pattern!	Make up your own math activity today and share it!
Ask six people what their favorite kind of pizza is. Draw a pizza with 6 equal slices and draw the toppings accordingly!	How many years old are you? Calculate how many months that is!	Record some number pairs that will together make 100!
Think of things that come in 5's like a pack of gum! Skip count by 5's until you get to 100! Then try skip counting backwards from 100!	Pick up a book. Try to find items that are lighter than the book. Then try to find things that are heavier than your book. Sort them and take a picture of your items.	Go on a shapes hunt for triangles and quadrilaterals. How are they similar? How are they different?

Rainy day? Need a break from the sunshine? Hop onto Dreambox! Keep tally marks here for each day you go on Dreambox!
